

## 2020 Annual Lake Parker Boat and Water Safety Committee Report

With the above average warm weather this season there has been an abundance of activity on the lake. Water activities of all kinds from kayaks, boats, paddleboats, and standup paddle boards. While we hope everyone is following safety protocol and state water regulations it has been noticed on many occasions that there has been no life vests worn or seen on many standup paddle boards. While we have no enforcement power I have brought that to the attention of the boarders when they are in my vicinity. I have suggested to Brenda Plastridge to post the regulations (short form) to our website and she has agreed and will do so. It is suggested that those renting their camp have that posted so those renting are aware of the regulations.
