

Lake Parker Association  
Recreation Committee Annual Report

The social/recreation gatherings came to a halt during the past year with Covid. There has been no “Boat Socials” or “Hot Diggity Dog Cookouts” to protect and keep safe all campers on the lake.

We were very fortunate to have several family groups work independently on various tasks to keep the walking path open and in good shape. Chainsaw work to take care of fallen trees, some new trail signs to easily spot bridge crossings in the field, and some more work securing the decks of bridges are just a few examples. The never-ending clearing of grasses to keep the trail bed passable is always very time consuming.

As we look forward to gathering restrictions being eased The Recreation Committee will once again look for work groups to update the walking path with hiker safety the first concern. We are happy with the number of hikers that are on the trails. We are working on a video of the hiking path to add to our website.....so stay tuned.

In addition to meeting as a group for the Annual Meeting there are some thoughts of having a lake wide gathering of Celebration for the 50<sup>th</sup> Anniversary of the LPA. We will post the information of such on the website as well as sending an e-mail blast to everyone.

Please feel free to contact this committee with any thoughts, suggestions, or comments to
