

Water Quality Committee Annual Report

This year I am continuing research on Phragmites around the lake, Misha Cetner and Elizabeth Spinney from the State of Vermont have been assisting me with getting a survey underway.

I have joined Bob Richards. in water clarity testing, learning this procedure to assist Bob.

I am in the process of retrieving all information from Jim Kellogg to become involved with the Larosa Tributary Water Quality Program.

I am currently working with Amy Picotte, State of Vermont to gather information on the Vermont Lake Wise Program and will disseminate the information to all members who might be interested in this program.

I have also attended the Annual Meeting and workshops provide by the Vermont Federation of Lakes and Ponds this year.

I will be working with the Board to provide a list of speakers/topics that our members may find useful. If there is enough interest in having a speaker come to us I will organize the event. More information will be coming soon on all of the above in the next month, if you have any subjects of interest please email me at WaterQuality@lakeparker.org.

Water Quality Committee

Boat & Water Safety Committee Annual Report

2020 we saw an increase of activity on the Lake. We assume this was due to families enjoying the Lake more during COVID.

There were reports of people not wearing life jackets, boats chasing loons, unleashed dogs chasing ducks on the shorelines in the water and other acts of harassment of wildlife.

Working with the board of directors these issues have been addressed through Frequently Asked Questions posted on our website and included in membership packets that were handed out to every property owner on the Lake.

Enjoy summer on the Lake, and remember to please follow State of Vermont rules and regulations for everyone's safety.

Steve Cutler

Chair, Boat & Water Safety Committee
